

ELIJAH SANDLER

elijah.sandler@gmail.com | (857) 352-9475 | Brookline, MA | elijahsandler.com

Available May 2026 - Aug. 2026

EDUCATION and ACADEMIC HONORS

Northeastern University, Boston, MA | Khoury College of Computer Sciences
Candidate for B.S. in Data Science and Philosophy

Sept. 2022 - Present
Expected Graduation Dec. 2026

Honors: GPA: 3.89/4.0 | Dean's List, All Semesters
Relevant Coursework: AI & Machine Learning, Algorithms & Data Structures, Database Design, Information Presentation, Information Storage & Retrieval, Linear Algebra, Statistics
AI Ethics, Evolutionary Game Theory, Moral Philosophy, Technology & Human Values
Extracurriculars: [AI and Data Ethics Working Group](#), Club Ultimate Frisbee

TECHNICAL SKILLS

Languages: *Proficiency in* Python, SQL | *Familiarity with* C++, HTML / CSS / JS / TypeScript, R
Libraries and Tools: AWS, Azure, BigQuery, Git, MCP, NumPy, scikit-learn, TensorFlow

WORK EXPERIENCE

AI and Research Co-op | Institute for Economics and Peace (IEP), *Sydney, Australia* Aug. 2025 - Dec. 2025

- Integrated AI and large-language models into workflow for research and executive teams.
- Built agentic chatbot connected to IEP databases and specially trained for use by the IEP team.
- Analyzed technologies in the AI and database spaces and advised leadership on potential directions.
- Developed algorithm for attributing terrorist attacks with unknown perpetrators.

Teaching Assistant - Ethics and Evolutionary Games | Northeastern University, *Boston, MA* Jan. 2025 - Apr. 2025

- Assisted instructor with course planning, syllabus design, and content development for a game theory course.
- Mentored students and evaluated students' math and philosophy-driven projects.

Data Visualization and Development Co-op | Network Science Institute (NetSI), *Portland, ME* Sept. 2024 - Jan. 2025

- Designed, developed, and published the [epidemic-intelligence](#) Python package for NetSI.
- Created user-friendly methods for processing and visualizing large-scale network simulation data on BigQuery.
- Participated in network science research groups and meetings.

Teaching Assistant - [Ethics and Emerging Technologies](#) | Northeastern University, *Boston, MA* Jul. 2024

- Worked as TA for an introductory level ethics course for high school students.
- Independently planned and taught lesson on game theory and its applications to modern technology.

Research Assistant - Philosophy of Technology | Northeastern University, *Boston, MA* Sept. 2023 - Dec. 2023

- Conducted literature review for a research project on the simulation hypothesis.
- Updated project research team on extent of existing technical and philosophical literature.
- Advised research team on feasibility and potential directions of project.

Machine Learning Methods Research | Northeastern University, *Boston, MA* Aug. 2023 - Apr. 2024

- Won PEAK award research grant from Northeastern University's Office of the Provost.
- Researched and applied novel machine learning methods for variables with low sample size and high variance.

[Ultimate Frisbee Coach](#) | Brookline High School, *Brookline, MA* Mar. 2023 - June 2025

- Coach Brookline High School Boys JV Ultimate Frisbee team.
- Responsible for running JV program, including scheduling, training, communication, and logistics.

ADDITIONAL PROJECTS

NBA Elo Ratings | Python Dec. 2023 - June 2025

- Implemented a weighted Elo algorithm to calculate NBA team strengths and produce dynamic visualizations, as well as predict the most likely playoff outcomes.
- Identified and analyzed discrepancies with other popular metrics of NBA team strength.

Evolutionary Ethics Simulation | Python Oct. 2023 - Dec. 2023

- Used TensorFlow to build a neural network to explore the Lewis signalling game as a model of the minimal conditions for the evolution of meaning.
- Successfully validated hypothesis and demonstrated significance of the findings.

INTERESTS

Outdoors/Sports: Camping, Chess, Soccer, Basketball, Fencing, Hiking, Motorsports, Ultimate Frisbee

Miscellaneous: Reading, Role-Playing Games, Simulation and Strategy Games, Urban Planning, Writing
